Agenda item 3. Climate Change Initiatives Program – A one-page summary was submitted on behalf of M. Bartenhagen (copy attached)

Agenda item 4. Composting Task Force. Nothing to report

Agenda item 5. LED Street Light Conversion – Dater updated committee on status of LD 1845

The meeting adjourned at 7:25 PM

Climate Action Plan Task Force ~

The CAP Task Force has reviewed and consolidated the public outreach survey and it will appear on the Town's website, in paper versions at Town Hall, the Library, social media, TV, and as a Town 'news flash'. The launch is tomorrow, 4/28.

There will also be flyers placed at HB Provisions, Cummings Market and other locations advertising the survey and the reason for it with a QR code for people to access the survey on line.

You can begin looking for all this tomorrow!

Survey Results will be evaluated through May & June.

The next CAP meeting is 5/2, during which we will evaluate the Climate Vulnerability Assessment Summary that SMPDC has created for the Town of Kennebunk and provide feedback to Karina Graeter (who will be in attendance).

Further discussion at this meeting will focus on next steps for additional public outreach through May & June, with a target of July for beginning to develop strategies to incorporate into the final Climate Action Plan.
