

Seed-Starting Workshop

Date: March 14, 2015

Time: 10:30 a.m.

Location: Community Room, 14 Park Street (Park Street School), Kennebunk

Just in time for the 2015 gardening season, this workshop will focus on the basics of seed-starting. Starting seeds indoors is cheap and easy, and it allows you to grow vegetables and flowers you wouldn't find in your local nursery or garden center. Most seeds can be started 6 to 8 weeks before our last frost date.

For gardeners new and experienced, come one, come all. It's time to get our hands dirty and get the jump on the gardening season!

P.S. We will have applications available during the workshop for the 2015 season at Park Street School Community Garden. The West Kennebunk Community Garden is already full, and Park Street only has a few more openings. You need to take your completed application to the Town Clerk; later (when we can actually get into the garden!), we will assign your garden space and review garden policies.
